work

Wanderlog, San Francisco, CA   2019-Present
Senior Software Engineer
- Hired as employee #1 of VC-funded startup (YC W19), designing and building consumer travel app for trip planning and itinerary collaboration.
- Critical in design, implementation, and launch of mobile app; naming and branding of product; fullstack engineering across web and mobile.
- Active in interviewing, hiring, and mentoring of new employees; currently managing 2 engineers on the team.

YouTube (Google), San Bruno, CA   2015-2019
Senior UX Engineer, YouTube Music
- Led UX for music subteam focused on fan engagement, designing features and defining team vision for artist presence, social sharing, and user profiles across the product.
- Developed high-fidelity iOS prototype of mobile app as part of major redesign and relaunch of YouTube Music product, working closely with UX and product team to establish final designs.

Software Engineer, YouTube Music
- Executed numerous projects on growth and iOS teams, working across mobile and backend codebase to drive innovative features for onboarding, user engagement, and core functionality.
- Promoted twice throughout tenure at YouTube, receiving over 20 bonuses from peers and managers and touching the design and implementation of nearly every surface in the music app.

University of Pennsylvania, Philadelphia, PA   2013-2015
Teaching Assistant, Introduction to Computer Science
- TA'd for 350-student course, leading 15-student recitation sections and holding office hours.

Goldman Sachs, New York, NY   Summer 2014
Summer Analyst, Technology
- Designed and developed rapid, user-friendly search engine over multiple large sources of reference data, speeding up search capability over 100x for cross-divisional internal users.

Chat Sports, San Francisco, CA   Summer 2013
Software Engineering Intern
- Designed and built website features; engineered CRM tool for 15k-user database; refactored and revised PHP codebase for rapidly-growing sports media website and social network.
